

Consumer and Small Business Shopping, System of Record, and Enrollment Decision Support Tools for MNsure: Responses to Responder Questions-Solution 3

June 28, 2017

Question	MNsure Response
<p>Please identify the agencies which comprise the interagency governance structure and any governance requirements related to reporting, meeting attendance and frequency.</p>	<p>The governance structure is comprised of Minnesota IT Services, the Department of Human Services, MNsure and representatives of Minnesota Counties.</p> <p>Project and program status reporting and meetings are weekly. Governance meetings are up to bi-weekly. Governance attendance by Respondent will not be required except upon request by MNsure or MN.IT</p>
<p>The RFP makes multiple references to integrating with the MNsure METS system. In order to determine necessary resource skills and quantity, request MNsure provide technical details for each METS system, and existing integration tools, that require integration under this solution.</p>	<p>Technical details for the METS system are not being provided. This should not be an impediment to responding to the RFP.</p>
<p>Is the expectation that Responder for Section 3 or the Responder for Section 1 will provide the integration services?</p>	<p>If Solution #3 (Program Oversight and Integration) is not awarded then the respondent for Solution #1 (Consumer Shopping, Enrollment System of Record and Decision Support Tools) would be responsible for providing integration services. If Solution #3 is awarded then the integration services could be provided for the awardee of either solution.</p>
<p>Has the State set a target for the total hours expected from the existing State staff to assist with the RFP implementation and training on the new system? If yes, can that target be shared with vendors?</p>	<p>No target has been set for internal hours. This should not be an impediment to responding to the RFP.</p>
<p>Are there any entities, other than MNIT, such as consultants and systems integrators, Responder will need to coordinate with?</p>	<p>No. If other vendors are needed for the project, then MN.IT will provide the coordination with those vendors.</p>
